Notation and abbreviations	8
Glossary	10
1 Motivation	12
2 Linear repetitive processes — a challenge for algorithms and computation	15
2.1 Stability	18
2.2 Conclusions	21
3 Linear matrix inequalities	22
3.1 Introduction	22
3.2 Basics of LMI	22
3.2.1 LMI incorporation lemma	23
3.2.2 Bilinear matrix inequality and Shur complement	24
3.2.3 Geometry of LMI	25
3.2.4 Solving the LMI	25
3.3 Conclusions	28
4 Relaxed controllability test and synthesis problem	29
4.1 Relaxed pass profile controllability	30
4.2 An extension to D and CB matrices	37
4.2.1 The case when $\delta = \gamma$	38
4.2.2 Example	42
4.2.3 The case when $\delta < \gamma$	45
4.2.4 The case when $\delta > \gamma$	53
4.3 Two sided relaxed pass profile controllability	62
4.4 The synthesis problem for LRP with disturbances	64
4.4.1 Two sided relaxed pass profile controllable processes with disturbances	67
4.4.2 Measurable, finite, constant disturbances	68
4.4.3 Unmeasurable, finite, constant disturbances	69
4.4.4 Measurable, finite, varying disturbances	70
4.4.5 Example	71
4.5 Controllability enhancement method	74
4.6 Conclusions	76

5	Iterative learning control	78
5.1	Introduction	78
5.2	Background and initial analysis	80
5.3	Gantry robot	82
5.4	An ILC algorithm with the use of the state information	86
5.4.1	Analysis	87
5.4.2	Experiments	91
5.5	Conclusions	94
6	Solving the synthesis problem using the output information	95
6.1	Motivation	95
6.2	Output-based iterative algorithm as a repetitive process	95
6.3	LMI based ILC design	97
6.3.1	Multi-sampling	99
6.4	Gain optimisation and experimental verification	100
6.5	Conclusions	104
7	Incorporating robustness to the synthesis problem	105
7.1	Motivation	105
7.2	State-based algorithms	105
7.2.1	Gain-optimization algorithm	110
7.2.2	Experimental results	113
7.3	Output-based algorithms	117
7.3.1	Experimental verification	122
7.4	Conclusions	124
8	Iterative learning control for processes with zero Markov parameters	126
8.1	A case when $CAB \neq 0$	127
8.1.1	The mixed preconditioning algorithm	127
8.1.2	Generalization to $CA^hB \neq 0$	132
8.1.3	Output signal only design	137
8.2	Experimental results	138
8.3	Conclusions	140
9	LRP toolkit	143
9.1	Visualization	144
9.2	Stability analysis	146
9.3	Solving the synthesis problem	146
9.4	Usability enhancements	146
9.5	Implementation details	147
9.5.1	The <i>lrp.controller</i> field	148
9.5.2	The <i>lrp.stability</i> field	149
9.6	Example	150
9.7	Conclusions	152

10 Concluding remarks	153
Bibliography	155
Index	161
Streszczenie (Summary)	163
